

The Baltimore Bicycling Manual QUESTIONNAIRE

July 2009

This series of questions is to be used to help develop a grassroots bicycling manual for citizens and bicyclists of Baltimore City. Your input as a fan of bicycling is essential—we're looking to make this a truly indispensable resource, and the more opinions and experience we can draw from, the better! Please take a moment or two to answer these questions as best you can (please print legibly!). *Questions, comments, and longer responses can be directed to Steve at 443-653-2120 or via e-mail at editor@let-off.com. We welcome your input!*

THANKS!

If there was one way you could best improve the safety of all bicyclists in this town (while still having automobiles on the road), and cost was no object, what would it be?

What are the top three tools you can recommend to a bicyclist who wants to do most of their repairs themselves?

Judging from the topography of Baltimore and the nature of its roads, what do you look for in a bike when you plan to ride around the city?

What do you do differently when you have to ride in inclement weather?

What bike shops do you visit frequently? Why do you choose to go there instead of other places?

Why do you choose to ride?
